

Duct burners

ECOSTAR air heat burners are especially designed for direct fired air heating: process air is directly mixed with combustion gases.

The burner is characterized by a wide turn-down ratio, simple control and high efficiency and is suitable for firing natural gas, town gas and LP gases; this flexibility makes the burner the ideal heat source for: Many Industrial drying processes for complete or surface drying of:

- Textile and carpets

- Malt, corn, wood an veneer
- Paper, cardboard, chip-wood, gipsum plates
- Paint, print work coatings
- Ceramics, brickwork, glass
- Fertilizers, a.s.o.

Make-up air systems for:

- Spray booths, welding shops, garages etc.

The combustion is absolutey clean with no danger of CO or aldehydes.
